

3. COMMUNITY AWARENESS AND EDUCATION

QFRS Rural Operations actively promotes rural fire prevention and bushfire safety in an endeavour to increase public awareness of the responsibility property owners have to protect themselves and their assets from bushfire. QFRS Rural Operations encourages all members of the community to minimise the risk of bushfire by taking adequate precautions on their own properties, particularly prior to the start of the bushfire season.

Your brigade can play an integral part in promoting fire safety and awareness throughout your local community, including the promotion of household smoke alarms installation.

A wide range of resource materials on fire prevention, mitigation, and suppression, together with other promotional material, is available free of charge for distribution by brigades to property owners, interested members and the general public.
