

### What I Need to Know

- Each year the Area Director, Rural Operations reviews a Bushfire Incident Management Team (IMT) Plan for each shire. This will include potential IMT members, locations of Incident Control Centres and staging areas, contact details, etc.
- Plans for particular areas of land that require a fire management plan will be prepared by the Area Director, Rural Operations after consultation with local brigades, fire wardens, wildfire committees and other stakeholders.

### How I do it

- Consider local areas that might have recurrent fire management problems and discuss these with the Area Director, Rural Operations.
