

What I Need to Know

A full review is currently being undertaken of all existing Workplace Health and Safety (WH&S) arrangements, policies and procedures applicable to Rural Operations. Part of the review will involve the development of recommendations, including an implementation plan, designed to ensure QFRS is meeting its safety, support and legislative obligations to both staff and volunteers.

This section of the manual will be completed as part of the review process.

Reference Materials

- *Workplace Health and Safety Act*
